FUME [ ] CARE

# CATENT

The Portable Cyanoacrylate Fuming Tent is ideal for developing latent prints from cars or any other large crime scene items recovered. Setup is quick and simple and easily transported between locations.

Cyanoacrylate is placed inside the portable chamber. Starting the cycle triggers the automated electronic system to control the hotplates, humidity, internal circulation fans, and purge cycle.

Harmful fumes pass through the units filters, re-circulating clean air back into the atmosphere.

There is no need for expensive ducting to be installed due to the units recirculatory airflow.

The safety alarm will alert the operator if face velocity falls below 0.3 M/Sec.

Its ductless and portable design allows for the unit to be easily transported.

CA-TENT-01

Designed by leading fume filtration specialist, John Haugh.

Product manufactured in ISO 9001 quality controlled facilities.

## CONTENTS OF KIT

1 x Electronic Control Case

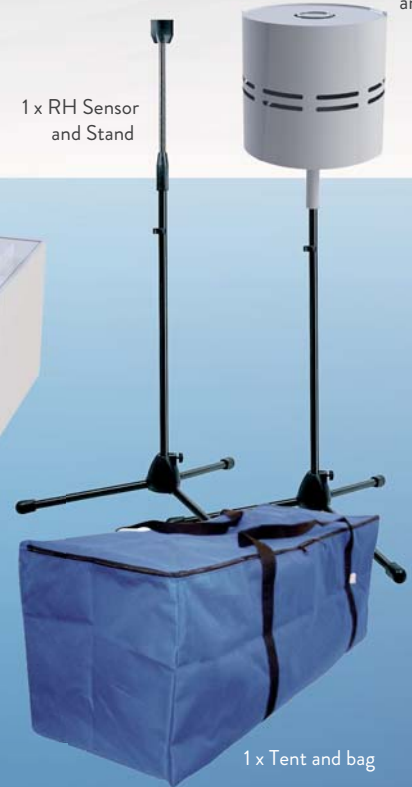

1 x Connection Lead Set

1 x Humidifier

1 x Purge Fan Filter Module

1 x Tent and bag

4 x Hotplate, Recirc Fan and Stand

1 x RH Sensor and Stand

Catalogue No	CA-TENT-01
Dimensions (WxDxH), mm	5000x2200x2500
Airflow (m3/hr)	250
Prefilter (efficiencies superior to 99.6%)	1
Main Filter 5kg (qty)	1 x 12 kg
Electrical Supply	Single Phase, 230v, 50Hz
Noise (dBA)	<55
Switches	Mains ON/OFF
Monitoring	Programmable Touch Screen Electronic Display
Fan	Low Noise Centrifugal

## CONSUMABLES

Replacement Main Filter	FCS-CA-001
Replacement Prefilters (pack of 6)	FCS-CA-PR
Humidifier Wick Filter	FCS-CA-WICK
